

Pro-Biotic with FOS™ Intestinal Flora Support

90 - 200 mg capsules per bottle

Price: \$49.95

Meat-based protein produces large quantities of pathogenic microbes... bad bacteria that interfere with digestion and literally destroy the "second immune system" in the GI tract. Enriching Gifts Pro-Biotic destroys these anaerobic or parasitic bacteria with 8 "good-guy" bacterial strains to help suppress the "bad guy" bacteria, improve absorption of minerals, and reduce the level of toxins in your body.

Having 'friendly' bacteria in the intestines is one of the keys to boosting the immune system but they are destroyed by a variety of common factors including:

Carbonated drinks Laxatives Birth control pills Coffee & Alcohol Aging Stress
And antibiotics... those taken for infections, colds and flu and even those in our meat!

Friendly aerobic bacterial strains aid in digestion and elimination by suppressing harmful anaerobic bacteria. But they also improve absorption of minerals and reduce toxins in the bloodstream and GI tract.

Key Benefits:

- Acts on the body's 'second immune system'
- Proven to increase digestion and elimination of toxic waste
- Wards off disease by suppressing harmful bacteria growth and eliminating potential floating immune complexes
- Helps support and produce enzymes which are essential to proper intestinal function.

Proprietary Blend:

**L. Acidophilus DDS-1™
Fructooligosacharrides
L. Plantarium
Zinc (AAC)
E. Faecium**

**S. Thermophilus
L. Bulgaricus
Magnesium (AAC)
L. Salivarius
GR8CF-77™ Enzyme Blend**

**L. Bifidum
Calcium (AAC)
L. Rueteri
Manganese (AAC)**

The Professional Advisory Council of Enriching Gifts International and Ronald K. Schneider have combined their accumulated knowledge and experience in the holistic nutritional field to develop and formulate this very effective product which is the finest flora available on the market today. The strains of bacteria are selected and manufactured according to the proprietary processes developed by Dr. Khem Shahani, the world's leading expert in the area of friendly bacteria.
